PROFESSIONAL SUMMARY

Web Developer and UI/UX Designer with practical experience in delivering responsive, accessible, and user-focused digital solutions. Strong understanding of interface design principles, layout optimization, and collaborative development workflows. Demonstrated ability to translate concepts into functional products through hands-on projects and internships. Experienced in using AI tools to support design decisions, accelerate development tasks, and improve overall workflow efficiency.

INTERNSHIP EXPERIENCE

Internshala Trainings

April 2025 – June 2025

Web Development Trainee

- Enhanced adaptive and mobile-friendly web pages following modern UI/UX standards. Improved page load performance by approximately 25% through layout and structural optimization.
- Converted UI designs into functional frontend components in collaboration with the development team.

Knewton Tech

June 2025 – July 2025

Web Developer Intern

- Completed structured frontend development training covering responsive layouts and component-based design.
- Built 3+ hands-on mini projects focusing on clean, maintainable code practices.
- Gained practical exposure to real-world development workflows and version control.

EDUCATION

Kangeyam Institute of Technology

(2023 – 2027)

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science

- Current CGPA (up to 5th semester): 8.18 / 10

Muthamizh Government Higher Secondary School, Arasampatti

Higher Secondary Education (12th Grade)

- Percentage: 73%

TECHNICAL SKILLS / TECHNOLOGY

Frontend

: HTML5, CSS3, JavaScript, React.js.

UI/UX Tools

: Figma, Adobe XD, Canva

Backend & APIs

: Node JS, Express JS, RESTful APIs, FastAPI

Databases

: MongoDB, SQL (Basics), PostgreSQL

Tools

: Git, GitHub

Core Skills

: Data Structures & Algorithms, Problem Solving.

PROJECTS

Smart Expense Tracker – Finance Management Application (Ongoing)

- Developing a full-stack expense tracking application using React Native, Node.js, Express.js and MongoDB for efficient personal finance management.
- Implemented features such as user authentication, expense categorization, dashboard analytics, transaction history and data visualization charts
- Working on SMS-based transaction detection to automatically identify payment messages and store expenses in the database.

Crackit360 – AI-Powered Aptitude Practice Platform (Ongoing)

- Contributing to frontend development, UI structure and Database for an interactive learning platform.
- Enhanced user engagement by improving navigation flow and interface consistency.

Advanced Multi-Layer Caching Strategy – High-Performance API System

- Designed and implemented a multi-layer caching system using LRU Cache (in-memory), Redis (distributed cache), and Database fallback to optimize API performance.
- Reduced backend response time from ~1000 ms (DB MISS) to sub-millisecond latency on cache HIT.
- Built an interactive frontend dashboard to visualize real-time cache source, cache status (HIT/MISS) and response time metrics.

Tamil Nadu Tourism – AI-Powered Smart Tourism Platform

- Expanded frontend interfaces for tourism dashboards, alerts and data visualization.
- Improved information accessibility through user-focused layout and experience design.

Expense Tracker – Personal Finance Management Application

- Built a web-based application to record, categorize and monitor daily expenses.
- Designed a clean UI to improve data clarity and usability for personal finance management.

ZeeFast – AI-Based Food Delivery Web Application

- Improved a Swiggy-inspired food delivery platform with responsive UI and AI-based recommendations.
- Implemented complete user flow including cart, profile, order history, and payment interface.

Wobble Company – Table Reservation UI/UX Case Study (Internship Selection Task)

- Created a complete UI/UX case study including user flow, wireframes, and high-fidelity prototypes.
- Improved usability and visual clarity for a hotel table reservation system.

CERTIFICATIONS

- Coursera – Google UX Design (Foundations of User Experience)
- Coursera – Microsoft (UI & UX Fundamentals)
- Coursera – Board Infinity (Backend Fundamentals)
- Simplilearn – Figma, Adobe XD
- GeeksforGeeks – Python
- HackerRank – CSS
- Scaler Topics – React JS

ACHIEVEMENTS

- Solved 160+ Python problems on GeeksforGeeks.
- Solved 160+ Python problems on LeetCode.
- Currently maintaining a 130+ days ongoing coding streak on LeetCode by consistently solving Data Structures and Algorithms problems to improve problem-solving and programming skills.
